<u>Full circuit</u>: Varied in the extreme! The walk combines the wonderful view from the top of the Darland Banks nature reserve (Direction 14) with Chatham's urban fringe, a good deal of quiet suburbia and stretches of open countryside.

#### Roads and hindrances:

Much of the walk is on roads, most - but not all, relatively harmless. It is worth crossing the road after St Stephen's Church (59) quite early, to avoid the complexity of the junction further ahead. And the roundabouts around Princes Park (71B and 72) are busy enough to command particular respect.

There are a few healthy climbs, but only the one up from Emily Way (73) is significantly steep.

71A		To reach Princes Park Church, do not cross the road at Direction 71, but carry on down the left-hand side and turn left at the roundabout at the bottom instead of right. Stay on the left-hand side of the main road.		0.00
718	2	Cross the side road and find <u>Princes Park Church</u> over on the left.  After visiting the church, retrace your steps towards the roundabout, crossing the main road to the left-hand side when convenient, and before reaching the roundabout (using the footbridge if necessary).		0.10
71C	4	Pass the roundabout and continue ahead to a second one.		
71D	5	Rejoin the main route by turning left up Wren Way, as at Direction 72.  Add 4 minutes to subsequent total times and 0.20 miles to cumulative distances.		0.25

### FOR THOSE WHO WALK WITH THEIR DOGS

I do not venture to give advice about walking with your dog. As well as the joys, you will be well aware of the issues involved, and particularly that relationships between dogs and other countryside animals potentially involve mutual suspicion, or worse.

But what this footnote does try to do, in response to requests, is to give some indication of the nature of the walk from a dog's point of view, to enable you to decide whether it is suitable.

The percentage distances on the right should be self-explanatory.

The information in the middle column may look a bit cluttered, but I think it should enable you (if the detail is of interest) to mark up within a few minutes a print-out of the walk notes, so that you have some idea what might be round the next corner.

The risk in all this is that <u>things change so quickly</u> in the agricultural working world; and what I describe might become misleading after subsequent changes. I have done my best, but there is no guarantee that you will find the information up to date!
